INTERNET

GET ONLINE WITH CONFIDENCE

SRT delivers superior fiber Internet to connect you to work, entertainment, or anything in between. And we back it with 24/7 local support and a 75-year legacy.

Your proven local cooperative and internet provider.

We're here.

This is your local, 24/7/365 support team of people who live in the communities you call home. You have experts close by ready to help you make the most of your Internet.

We built here.

SRT's fiber optic network is the gold standard of Internet technology. Our fiber goes all the way to your home or business – not just to your town or street. SRT's Fiber to the Premise brings you faster, more reliable internet than other providers offer - with low latency (for real-time activities like online gaming) and symmetrical download and upload speeds (for virtual meetings, remote work, and cloud backups).

We've always been here.

Your community isn't our latest business venture. We were born and raised here. For 75 years, SRT has existed to serve you and your community. We even have members who've chosen SRT since 1951. That's proven staying power, owned by members and governed by the mission to connect you to a life well lived.
