Baobab Carrier Oil

Adansonia digitata

Our soft, silky Baobab oil brings your essential oils to life like no other. Full of Omega-3 fatty acids like palmitic, oleic, and linolenic, Baobab Carrier Oil helps treat your skin without clogging pores. Distilled from the seeds and fruits of our local baobab trees here in Madagascar, this oil makes for the perfect addition to any essential oil set.

▼ Properties

The Omega-3 fatty acids in our Baobab Oil help build up your skin's protective barrier. It also helps your skin stay moisturized, feel softer and more elastic. It may reduce the appearance of fine lines and wrinkles, but it should never be used close to your eyes, mouth, or nose.

▼ Benefits

Our Baobab Carrier Oil helps you use your best blends as a topical treatment on your skin. It adds an additional level of skincare while helping your favorite essential oil combination come to life.

Baobab oil helps skin heal, stay soft and smooth, and reduces scars and stetchmarks. It also feels incredible as a massage oil on its own or blended

with jojoba, almond, or coconut oil.

▼ How to use it

Make a stunning massage oil for a topical treatment with your best essential oil blend. Mix 200 ml with two to three drops of the essential oil blend and stir it gently.

Create a hair oil or hair mask with your Baobab Carrier Oil as a base for better texture, more shine, and a healthier scalp.

Make your own makeup remover or face moisturizer with this oil, taking care to avoid areas close to your eyes, nose and mouth.

▼ Safety guidelines

This oil is for external use only. Please consult your physician or an aromatherapist before using this oil on anyone under 5 years of age. Avoid using this oil on your lips, nostrils, or near your eyes.

CAUTION: People with sensitive or oily skin may have an adverse reaction to Baobab Carrier Oil. We at Origio Botanicals urge you to do a skin patch test with any new oil to check for reactions or allergies before you use this oil regularly.

To do a skin patch test, simply take a small amount of diluted essential oil and apply it to the inside of your elbow and cover the spot with a band aid. Then, wait at least two minutes to see if you experience a reaction such as irritation, itchiness or redness. Any of these mean you may have an allergy.

▼ Certifications

Our Baoabab Carrier Oil is certified organic.
