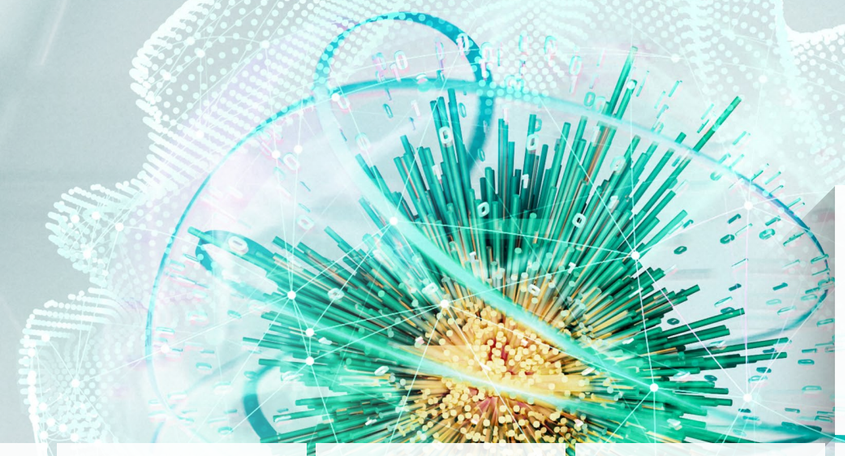
KASPERSKY lab

The A-Z of Kaspersky Lab Cybersecurity



A

Astraea
The cloud "cyberbrain" of Kaspersky Security Network.

B

Behavioral Analysis
Identifies malicious or safe applications, based on their behaviour.

C

Cyberthreats
We detect over 360k unique malicious objects every day.

D

DDoS
DDoS Protection keeps your business online when it's under attack.

E

Endpoint Protection
Kaspersky's Lab's is the world's most tested, most awarded security.

F

Fraud Prevention
Preserve the authenticty of transactions with Kaspersky Lab.

G

GreAT
Kaspersky's Global Research & Analysis Team.

H

HuMachine™
Human expertise + AI technologies = ultimate threat prevention.

I

Intelligence Services
Our knowledge is your power.

J

Java Vulnerabilities
Unpatched, they're one of the biggest, easiest software vulnerabilities.

K

Kaspersky, Eugene
He started Kaspersky Lab over 20 years ago.

L

Leader
Our leadership is recognized by independent analysts.

M

Multi-layered
Multiple, integrated layers of protection against cyberthreats.

N

Next-Generation
The protection of big data threat intelligence and AI.

O

Operating Systems
Protect Windows, MacOS, Linux and mobile platforms.

P

Patch Mgmt.
Find – and patch – vulnerabilities before the cybercriminals do.

Q

Quarantine
Where copies of suspicious files are stored until deletion.

R

Ransomware
Every 40 seconds, a business is attacked by ransomware.

S

Systems Mgmt.
Centralize, automate & control tasks like patching or license control.

T

Transparency
Our Global Transparency Initiative underlines our commitment to clarity.

U

Urgent Detection
Our cloud-based reputation verification system, powered by KSN.

V

Vulnerability Mgmt.
Find the security gaps in your software - and deal with them quickly.

W

Whitelisting
Ensure all the applications you run are safe, blocking anything nasty.

X

X-factor
