acumed
Medical Education

At Acumed, education is not just a cool buzzword, but something we take great pride in. It is at the heart of who we are. We believe surgeon education and training are essential to elevating patient standard of care and improving outcomes. That is why we are committed to supporting surgeons throughout their entire educational journey from residency to advanced medical professional.

Choose from a myriad of learning options, everything from participating in one of our Surgical Skills courses, diving deep into an ELiTE Resident and Fellow program, gleaning expertise with a virtual PRO series, or getting hands-on experience in our Acumed Mobile Cadaver Labs circulating the United States.

Medical Education

www.acumed.net

The ELiTE Resident and Fellow Curriculum is designed to meet the educational needs of orthopaedic and podiatric residents and fellows at every step of their training experience.

Each course provides exposure and surgical skills practice for commonly seen extremity fractures. The program offers standardized educational curriculum at multiple locations across the United States.
