

SEWAGE

In a highly-specialised sector like sewage, it is vital that your vehicles are kitted out with the correct equipment and the means to power that equipment.

AT OBP, WE UNDERSTAND THE UNIQUE CHALLENGES SEWAGE WORKERS FACE DAILY AND THAT'S WHY WE OFFER A BESPOKE FITTING SERVICE TO MAKE SURE YOUR VEHICLES ARE UP TO THE JOB.

ONBOARD POWER WITH OBP UTILITIES

OBP Utilities fit utility vehicles with a versatile compressor unit, which can provide power for a number of different uses. Our driveline compressor unit is mounted on the rear of the vehicle and power is delivered through the vehicle's prop shaft. This can provide power for tools and equipment when you are onsite.

For sewerage workers, you can power water pumps and suction equipment, as well as smaller power tools and onsite lighting required for the inspection of drains.

PANELLING AND STORAGE

Commercial vehicles can vary greatly between sectors and no-one knows this more than us. Through a detailed consultation process, we can design and fit the interior the vehicle to your specification. Panelling comes in either plywood, fluted plastic or aluminum. Vans can also be fitted with partition systems and work benches.

Our bespoke racking solutions mean you can design your storage the way it works for you. We can provide space for large piping, rods and equipment as well as sections for smaller tools and bolts, washers and screws.

We can cater to the specifications and measurements of any van, no matter the make and model and can offer additional interior options such as electric lighting and heating systems.

EXTERIOR SEWAGE VEHICLE SOLUTIONS

OBP Utilities provide top of the range compressor systems and high quality bespoke panelling and racking, so you'll want to make sure everything inside the vehicle is safe and secure. Among our exterior vehicle solutions, we offer the fitting of insurance-approved alarms systems as well as dead locks and lock protection system.

We also want you looking your best and staying safe and can provide a livery fitting service, include Hi-Vis tape and panelling on the front and rear of utility vehicles. Our exterior fitting service also includes tailgate and rear steps and warning beacons and sirens.

WITH YOU EVERY STEP OF THE WAY

From the initial inquiry, OBP Utilities will take you through every step of the process and help power you to greater success. We'll assist and advise in the design process and provide an expert fitting service. We also offer a comprehensive maintenance and breakdown service, meaning we are on-hand to make sure the OBP Utilities unit is always working for you.
