Ameya Learning: About Us Page

We Understand the Importance of Your Child's Education:

Children are forever curious and may ask you a million questions throughout the day with the hope that you have an exciting answer for each one. This excitement, however, isn't reciprocated when they respond with the dreaded "Nothing!" when it's your turn to ask the most important, and perhaps the only question from your share: "What did you learn at school today?" Ameya Learning takes on the responsibility to change that dull "Nothing" to an answer with endless learning possibilities. We offer virtual tutoring and learning to help students improve and advance in their academic careers through instruction that is both personalized and differentiated based on your child's academic needs. Our sessions are delivered through the globally trusted virtual meeting platform of https://zoom.us/ to ensure that your child can learn from the comfort and safety of your home. All you have to do is be prepared to listen to "Everything" they have to tell you about Fractions, Natural Disasters, and even Shakespeare.

We Have What You've Always Wanted from Education and More:

Ameya Learning believes that academic success is a learned habit. After all, intelligence is a learned skill, and not a personality trait. **Our mission** is to ensure that every child is given the right tools to build a work ethic that will help them succeed in school and beyond. **Our students** are taught by certified teachers so that their course material is consistent with the school curriculum, and our one-to-one student to teacher ratio promises that their understanding of it will be a whole new learning experience. **Our teachers** provide students with the necessary attention that they require in their learning journey, something that is lost in the large class sizes of today's schooling system. Moreover, student progress is monitored through the skills learned every session and discussed with the parents on a pre-determined, mutually agreed upon

schedule. That way, we always keep you in the loop and you're never left wondering what your child is learning with us. **Ameya Learning** strives to match our teaching pace with the learning pace of our students, so that no child feels left behind. We make lessons engaging by keeping valuable learning at the forefront of all our student plans to ensure that student success remains our top-most priority. Therefore, we offer our first diagnostic session free of charge, so that you and your child can both feel confident in our efforts to help you in your academic journey.
