Connect Lightning Bolt to the tools you already use

Why care teams love Lightning Bolt

85%+ time saved

The automated scheduling engine creates monthly schedules in minutes, with minimal manual clean-up.

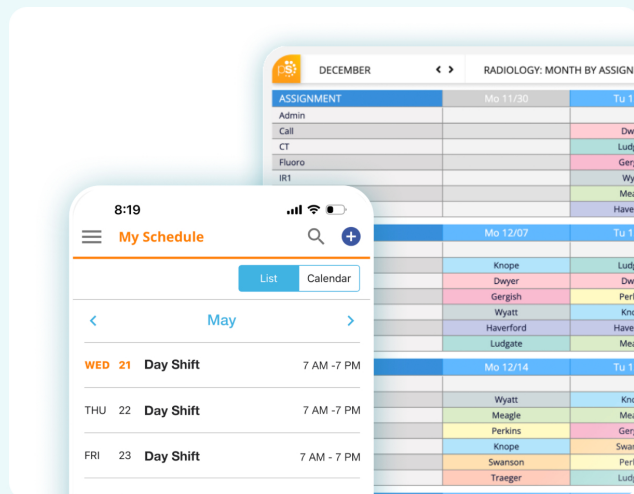

90%+ scheduling accuracy

Lightning Bolt's proprietary combinatorial optimization engine has unlimited rules to handle even the most complex needs.

24/7 white glove support

Our Rapid Enterprise Deployment team gets you live in under 3 months. Plus, we offer ongoing support, 365 days a year.

FAQs

How does Lightning Bolt use artificial intelligence (AI), and how does this differentiate it from other products on the market? —

Unlike other products that simply digitize manual scheduling or automate schedule builds, Lightning Bolt uses a flexible, AI-enabled process called combinatorial optimization to identify the BEST schedule from a finite set of possibilities.

By considering multiple variables such as staff availability, skill sets, and shift preferences, combinatorial optimization allows Lightning Bolt to rapidly auto-generate an optimal schedule for any staff, including nurses, mid-level providers, technicians, or physician assistants (PAs). It can also assign operating room (OR) cases to anesthesia staff and schedule examination rooms and even veterinarians.

By making the best use of resources and meets organizational constraints, it advances operational efficiency, improves staff satisfaction by building fairer schedules, and enhances patient care by ensuring that the right personnel are in the right place at the right time.

Can I transfer my current information from different software to Lightning Bolt? +

Can I get my schedule on my iPhone/iPad/Android device? +

Does it work on a Mac, Windows, or Linux? +

Can I import my schedule into Outlook/Google Calendar? +

Do you integrate with other solutions? +

Is there a limit on the number of providers or shifts the system can schedule? +

What technical support do you offer to setup and maintain Lightning Bolt? +
