

Data Processing Services for AI and Automation

High Quality Processing for Finance and Insurance

- ✓ Receipt Transcription
- ✓ Bill, Invoice, Loan & Order Processing
- ✓ Quality Control & Exception Handling for OCR
- ✓ Document Digitization
- ✓ Insurance Document Processing
- ✓ Robotic Process Automation (RPA) Support

Powering Expense Management at Scale

Riding a wave of double-digit growth, [Expensify](#) needed a reliable partner to process large volumes of receipts per complex business rules. Today, through Expensify's SmartScan feature, users upload photos of receipts and [CloudFactory](#) processes them in near real-time, syncing the data to user accounts.

- More than 1,000 data analysts process 3 million receipts each month.
- Expensify customers see an 80% improvement in turnaround time.
- Product leadership can focus on innovation rather than back-office operations.

Trusted by 500+ High-Performing Clients

"CloudFactory came in with a really clean and well-described set of ideas around performance management, scaling, and elasticity to move volume up and down based on our needs as a high-growth company."

Zev Barsky
VP Operations

Client Success: Digitizing Risk for Improved Insurance Outcomes

This client's risk data platform uses AI to digitize risk for commercial property owners. Each quarter, CloudFactory analysts pre-cleanse thousands of documents by identifying incomplete, incorrect, and inaccurate data. They also geocode those documents by pinning locations on digital maps.

- More than 100 data analysts provide 8,000 hours of monthly support.
- We support two unique tasks: Pre-cleansing and geocoding.
- Our insurtech client can focus on growth and delivering exceptional experiences.

Client Success: Turning Financial Documents into Digital Data

This leading fintech company uses cloud computing and machine learning (ML) to convert financial documents into data customers can use. Our analysts perform the real-time invoice transcription that powers their platform while handling automation exceptions and quality control to augment their ML model.

- The partnership brought our client a 100x processing capacity increase.
- CloudFactory data analysts process 1 million invoices each month.
- Add in the exception handling and QC for a total of 20,000 monthly hours.

GET THE QUALITY OF AN IN-HOUSE TEAM... WITHOUT THE BURDEN OF MANAGING ONE

✓ Quality at Scale

Each day, we process 100K+ documents for leading fintechs and insurers. We can work with you to scale your workforce while maintaining your quality standards.

✓ Speed on Demand

Your customers need speed and responsiveness; we deliver it. Our data analysts work across multiple timezones and can scale up and down as needed.

✓ Trusted Partnership

CloudFactory brings more than a decade of experience and expertise in data processing to the table. We'd love to partner with you to grow your business.

Get started with expert feedback and a no-cost analysis.
