Subject Line: INcompassing Education Supports Schools with New Services

Dear [Name],

I hope this email finds you well. We're in the thick of the school year, and that is why I'm thrilled to announce that INcompassing Education has expanded its team and services. Read about it in our recent press release.

We can now help your school by training teachers in Special Education, Elementary Math, High Ability, and MTSS (Multi-Tiered Systems of Support). Additionally, we've expanded our Secondary Math, K-12 ELA, Curriculum Mapping (aligned to HQCM), and STEM expertise and services.

Today, Indiana law requires elementary schools to base their reading curriculums on the Science of Reading. INcompassing Education is here to help you excel in this transition. We offer the expertise, coaching, and professional development your school needs to stay in line with state expectations and increase student achievement.

Science of Reading state grant funding only extends from K through 3, but many students in grades 4 through 9 could also benefit from a curriculum using this body of knowledge. We have the expertise and skills to help close this gap.

Founded in 2016, INcompassing Education coaches, guides, and trains teachers, principals, and superintendents. We proudly serve public, private, and charter schools, as well as higher education, throughout Indiana and in other parts of the country.

For details on how we can help you, we encourage you to read our October 25th press release.

Warm regards,
Dianne McKinley Ed.S.
Founder and CEO
