NATIVE PLANT NURSERY + REWILDING PROJECT

Located in northern Camas, Nature's Haven is a destination nursery for Pacific Northwest native plants. Our staff can't wait to help you fill your yard with beautiful plants that support our essential pollinators and wildlife!

Why plant native?

- 90% of herbivore insects are specialists: they can only eat a handful of native plant species.
- Keystone native species support up to 75% more caterpillar species.
- More caterpillars means more breeding birds and healthier baby birds.
- Established native plants are lower maintenance & need less water.

Open Wed-Sat 10am-3pm
