

Gain Better Insight into Your Enterprise

Esri has released two new applications to monitor daily operations and provide an intuitive data collection experience for field staff.

Operations Dashboard for ArcGIS

The new Windows-based Operations Dashboard app provides a common operating picture for organizations to track and report events and assess the performance of your daily operations. Monitor services, deliveries, people, and more, anywhere in the world.

Get the [Operations Dashboard](#).

Collector for ArcGIS

The new Collector app lets you capture and report field information directly from your iPhone or Android smartphone. Download the app from the Apple App Store and Google Play. Data captured in the field using the Collector app can be displayed in many of our ready-to-use apps including the Operations Dashboard.

Esri's New Power Couple

A pair of apps will help coordinate your GIS operations.

Esri has released two new apps, Operations Dashboard for ArcGIS and Collector for ArcGIS, that allow you to pull together and disseminate the most current geographic data while connecting the activities of your field and office staff.

Operations Dashboard for ArcGIS

What part of the operation matters to you most? Services? Deliveries? People? Monitor one or all of them from anywhere in the world.

Enjoy a view of your daily operations that includes interactive maps, lists, charts, gauges, and other performance indicators that update automatically as live geographic data arrives from the field, allowing you to respond to circumstances as they change.

[Download Dashboard](#)

Collector for ArcGIS

Use an iPhone or Android smartphone to gather data, attach photos and video, and edit maps, then display the updated data in Operations Dashboard for ArcGIS so others in the organization can see and respond to it in real time. Bring your GIS functionality to the field:

- Find places of interest
- Calculate distance
- Create service requests
- Report damage
- Plan routes and get directions
