

CLIMATE-SMART AGRICULTURE INNOVATIVE FINANCE INITIATIVE

The Climate-Smart Agriculture Innovative Finance Initiative consists of eight projects that aim to use innovative finance mechanisms to accelerate climate-smart practice uptake by farmers, leveraging private-sector demand to strengthen markets for climate-smart commodities.

This Initiative combines $70M in USDA catalytic capital with $66M in matching funds from partners and $40M in leveraged funds. These funds are used to support farmers in their efforts to scale climate-smart agriculture on their operations.
Of these funds, $81M goes directly to producers, of which at least $30M is for historically underserved producers.

FIVE YEAR PROJECT BENCHMARKS:

10.6M
acres enrolled

2.8M
metric tons of GHG reductions

$81M
total funds to producers

STATES INCLUDED:

COMMODITIES INCLUDED:

Alfalfa
Barley
Corn
Cotton
Livestock
Peanuts
Potatoes
Rice
Sorghum
Soybeans
Sugar Beets
Wheat

WHO IS FIELD TO MARKET?

Field to Market: The Alliance for Sustainable Agriculture® brings together a diverse group of agricultural supply chain and key stakeholders to define, measure, and advance the sustainability of food, feed, fiber, and fuel production in the United States. By uniting stakeholders around a common measurement framework, Field to Market seeks to drive continuous improvement in sustainability of commodity crop production. Learn more at fieldtomarket.org.

This document was developed to support Field to Market's Climate-Smart Agriculture Innovative Finance Initiative under agreement number NR243A750004G023 using resources which are funded by the USDA Partnerships for Climate-Smart Commodities Grant Program. Field to Market adheres to USDA's Nondiscrimination Statement.
