National Museum *of* Industrial History

Historic Bethlehem
MUSEUMS & SITES

¡Disponible en Español!

FOR 4th - 6th *GRADE STUDENTS*

The Steel Industry in Bethlehem: A Virtual Field Trip aligns with PA Common Core standards for History and Social Studies and is recommended for grades 4-6.

Historic Bethlehem Museums & Sites welcomes you to our first ever virtual field trip experience.

Students are guided from early industry in Bethlehem through the closure and revitalization of the **Bethlehem Steel** site, as they learn about the impact of the steel industry on local, national, and international scale.

With vibrant pictures, engaging video and fun activities, the interactive learning experience compliments our on-site visits from the convenience of the students' computers.

We have teamed up with the **National Museum of Industrial History** to create an in-depth learning experience for your students with even more activities to explore. Students will discover other local industries throughout Bethlehem's history and learn how those industries – along with Bethlehem Steel - helped the city become an important industrial community.

limited time introductory price:

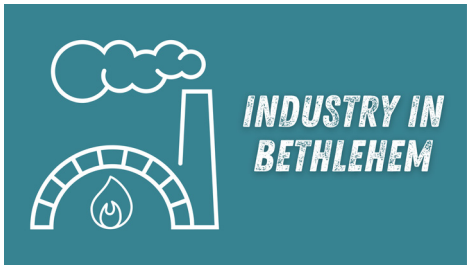

$7.00
per student

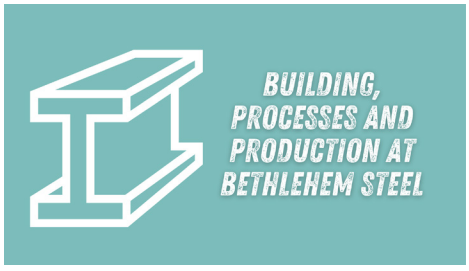

5
fun lessons

virtual or hybrid learning

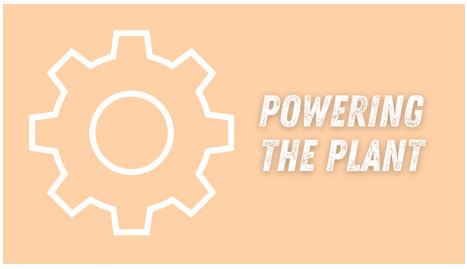

4 - 5 *HOURS OF CLASSROOM MATERIAL*

- Virtual experience is flexible to cater towards your learning schedule
- Explore as a single-day field trip or by each section individually for a fun activity throughout the week
- Content curriculum is divided into 5 sections, each ranging from 45 to 60 minutes

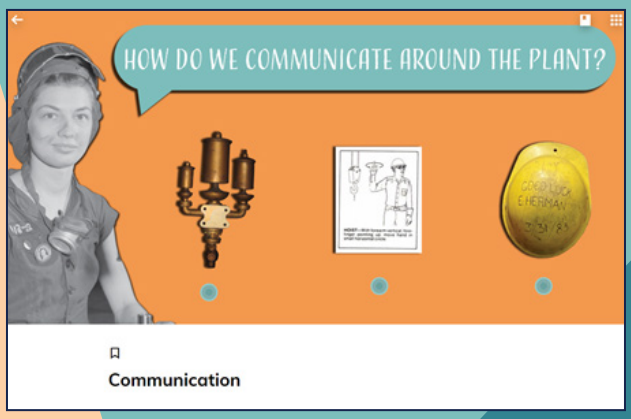

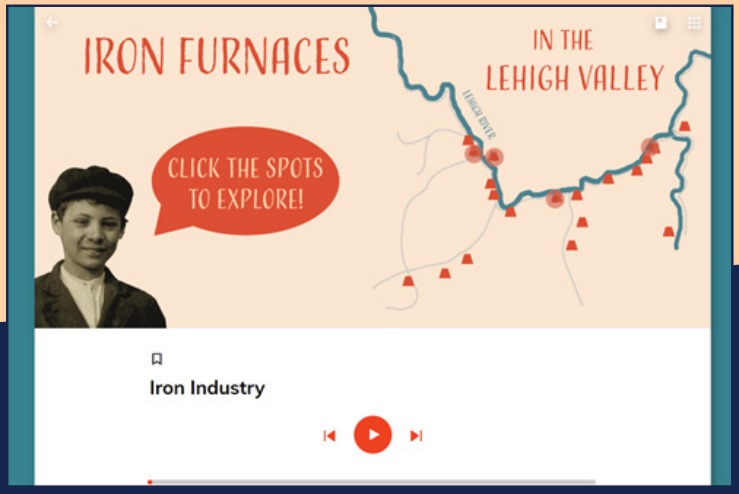

Optional pre and post-visit learning material available as well!

¡Disponible en Español! *Our online virtual tour is available in Spanish. Ask for more details.*

MEDIA & INTERACTIVES

- 8 - 10 minute introduction videos for each lesson
- Additional videos that expand upon topics
- STEM aligned activities allow students to better understand the science and technology principles used in Bethlehem Steel
- Exploration pages, games, and quizzes allow students to explore topics and test their knowledge
- Audio narration to help students follow the material they read

To ensure students receive the most from their experience, we include **hands-on activity instructions**, **video interviews** with a steel worker, and a fascinating **photo gallery** of past and present Bethlehem!

THE STEEL INDUSTRY IN BETHLEHEM

A VIRTUAL FIELD TRIP

"I didn't know that the Bethlehem Industry was a big part of people's lives in the past, and because of that, they had to use new ways of transportation such as canals and railroads."

"Seeing all the pictures from the past and now, I love learning about old, 'cool' history."

~ 5th-grade Bethlehem Area School District students
