PRODUCT DESCRIPTION - "NOVUS" WIRELESS HEADPHONES

Novus Pro Wireless Headphones

Hear What You've Been Missing

The Novus Pro isn't just another wireless headphone. It's an entirely new relationship with sound, meticulously engineered for those who understand that music isn't just heard—it's experienced.

Breakthrough Audio Architecture

At the heart of the Novus Pro lies our proprietary SoundField™ technology. Unlike conventional headphones that simply push sound at your ears, SoundField™ creates a three-dimensional audio environment that positions each instrument and vocal in precise spatial relation to the listener.

The result? You don't just listen to your favorite symphony—you sit in the conductor's chair. You don't just hear that classic album—you're standing in the recording studio between the artists.

Intelligent Adaptive Noise Control

The world doesn't go silent when you need to focus. That's why we developed AdaptiveSilence™ technology with 16 precision microphones that sample environmental noise 20,000 times per second.

Choose from:

- **Deep Focus Mode**: Eliminates 99.8% of external sound
- **Awareness Mode**: Allows important voices and announcements while blocking mechanical noise
- **Conversation Mode**: Automatically pauses music and enhances nearby voices when you begin speaking

Engineered for All-Day Comfort

The average listener wears headphones for 4+ hours daily. We designed the Novus Pro for those who demand more:

- Ultra-lightweight aerospace-grade aluminum and sustainably sourced wool construction
- Memory foam ear cushions that adapt to your unique ear shape
- Balanced weight distribution that eliminates pressure points

- Just 248 grams—35% lighter than leading competitors

Uncompromising Battery Life

True wireless freedom means never worrying about your charge. The Novus Pro delivers:

- 38 hours of continuous playback with noise cancellation active
- 62 hours with noise cancellation off
- Quick-charge technology that provides 5 hours of listening from just 10 minutes of charging
- Wireless charging compatibility with any Qi-certified charging pad

Technical Specifications

- Frequency Response: 5Hz - 40,000Hz (well beyond human hearing range for perfect reproduction)
- Bluetooth: 5.3 with aptX Lossless and LDAC support
- Drivers: 45mm custom beryllium dynamic drivers with separate planar magnetic tweeters
- Water/Dust Resistance: IPX5 rating (protected against low-pressure water jets)
- Connectivity: Simultaneous connection to two devices with intelligent switching
- Voice Assistant: Compatible with all major platforms with dedicated activation button

In the Box

- Novus Pro Wireless Headphones
- Premium hardshell travel case
- USB-C charging cable
- 3.5mm analog cable for optional wired connection
- Airplane adapter
- Quick start guide

Our Promise

The Novus Pro comes with a 3-year comprehensive warranty and 30-day risk-free trial. Experience sound as the artists intended, or return for a full refund.
