NATURAL-SOUNDING AI VOICE

## Why AI voice in banking and financial services?

**Simplify financial workflows**
Create and update voice content fast — for training, reminders, claims, and more.

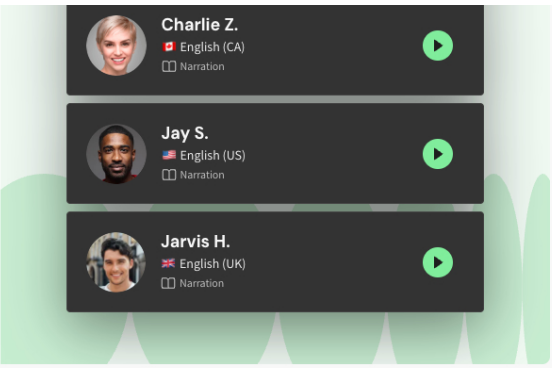

**Improve customer understanding**
Turn complex financial details into natural, trustworthy voiceovers that improve clarity and reduce miscommunication.

**Reach every audience**
Provide multilingual, accessible content that meets ADA and WCAG standards while ensuring inclusivity and customer satisfaction across every channel.

## Hear it for yourself

WellSaid's AI voices are built with professional voice talent and designed for clarity and trust. Each one sounds natural, consistent, and ready for any message that matters.

# The AI voice platform built for clarity, compliance, and scale

### Paste, edit, or upload scripts

Drop in text and generate lifelike voice instantly. Update anytime with unlimited retakes

### Choose your voice

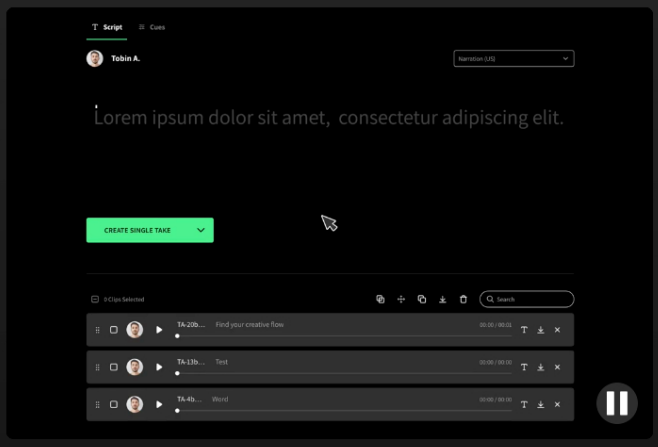

Select from hundreds of professional voices or match tone to your brand, audience, or use case.

### Adjust & customize

Fine-tune pronunciation, pace, and tone for perfect delivery on sensitive or regulated topics.

### Share & collaborate

Accessible workspaces keep every project secure, organized, and audit-ready across departments.

BUILT FOR CLARITY

## Make complex information clear and compliant

Transform dense financial documentation into clear, human voice content that builds trust and saves time.

- Convert training and onboarding materials into engaging voiceovers for internal learning systems.
- Deliver clear audio for compliance modules, certifications, and annual policy updates.
- Produce customer education content for loans, mortgages, or investment literacy.
- Automate voice scripts for customer notifications, service updates, and disclosures.

# AI voice for financial institutions

Automate communication, accelerate training, and deliver compliant content — all with a human touch.
