Unanet Data Lake

Get More From Your Unanet Data, Without the Manual Work

Unlock your data in Unanet ERP and put it to work. We help activate and optimize the Unanet Data Lake for government contractors who want faster insights, less manual effort, and smarter planning.

- Automate reporting and eliminate manual exports
- Enable real-time analytics across projects and financials
- Connect your data to tools like Oracle, OneStream, and Power BI

LET'S ACTIVATE YOUR DATA | WHY SC&H?

Built for GovCon. Backed by SC&H.

Unanet ERP is purpose-built for government contractors, and so is our support. When it comes to helping GovCon clients get more out of Unanet, we bring the experience and delivery model that sets us apart.

30+
years supporting complex government contractors

140+
Government contractor clients

100%
US-based, in-house advisory and data teams

Fast-track Insights, Eliminate the Busywork

The Unanet Data Lake is a powerful feature, but most organizations never fully activate it. That's where we come in. Our experts help you set it up, connect it to a data warehouse, and build the pipelines that keep your data flowing into the tools your teams rely on.

Build powerful dashboards & models

- Feed clean data into tools like Power BI, OneStream, or Oracle
- Create dashboards and analytics that refresh

automatically

Automate enterprise data flow

- Set up the Unanet Data Lake and initialize with new or existing data warehouse
- Streamline integrations between Unanet and platforms like Salesforce or legacy systems

Drill down to what matters

- Analyze labor performance at the task level
- Track budget burn, project completion, and resource utilization with precision

Turn Your Raw Data into Real-time Insights

What do clients gain by working with us? We bring the technical know-how and implementation experience to help GovCon organizations turn Unanet data into real-time insights, better planning, and faster decisions.

Faster reporting

Automate month-end reporting workflows

Cleaner data

Reduce the need for manual exports or Excel workarounds

Deeper insight

Get task-level visibility into labor, costs, and project performance

Easy integrations

Connect Unanet to CRMs, planning tools, and custom platforms

Smarter decisions

Analyze trends, spot risks, and make confident moves with live data

amentum

Before working with SC&H, we'd have to pull multiple reports and Excel spreadsheets to get one answer. Now, when I'm sitting with the CEO and CFO in real-time, I can pull data on the spot and know that it's right.

Matthew Moshier | FP&A Director, Amentum (formerly PAE)

Why Businesses Love Working with SC&H

From setup to self-sufficiency, our delivery model puts your team in control. Unlock the full potential of your Unanet Data Lake with a practical, client-led approach and scalable solutions that stick.

Built for ownership

We don't build black boxes. We create user-friendly solutions your team can manage independently, with no long-term consulting required.

Tech-stack fluent

We connect the dots across all your systems, ensuring seamless reporting and planning regardless of your technology stack.

Tailored to your business

No templates or one-size-fits-all playbooks. We design every solution around your team's goals, workflows, and reporting needs.

Partnership-first mindset

You'll get a strategic partner who listens closely, solves the right problems, and builds with your success in mind, not ours.

Ready to get more from your Unanet data?

If you're already paying for the Data Lake, make it worth the investment. SC&H helps you activate it, connect it, and turn raw data into real-time insights your team can actually use.
