NATURAL-SOUNDING AI VOICE

Why AI voice in healthcare?

Clear, compassionate communication.

- **Simplify healthcare workflows**
  Create and update voice content fast — for training, reminders, claims, and more.
- **Improve patient understanding**
  Turn discharge instructions and medical info into clear, human-sounding voice.
- **Reach every audience**
  Deliver multilingual, accessible voice content that meets ADA and WCAG standards.

The AI voice platform built for clarity, security and scale

Paste, edit, or type scripts

Drop in your text and generate voice instantly. Make updates anytime with unlimited retakes.

Choose your voice

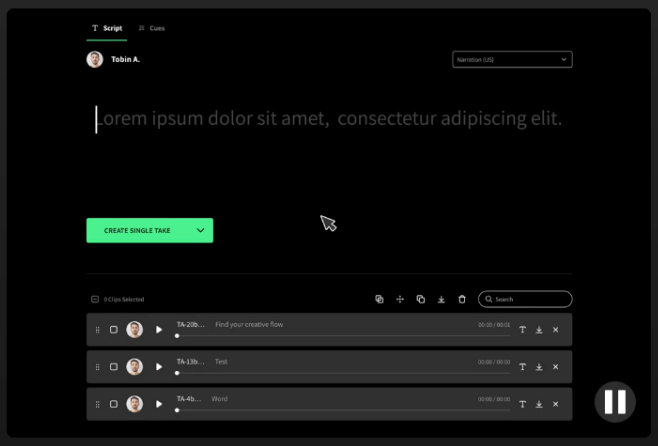

Pick from hundreds of realistic voices or get recommendations based on tone and use case.

Adjust & customize

Adjust pace, volume, and pronunciation to match the message and your audience.

Share & collaborate

Use HIPAA-ready Workspaces to keep projects organized and control access by team or role.

BUILT FOR CLINICAL CLARITY

Help patients understand and staff stay on track

Turn written instructions into clear, natural voice to improve patient understanding and reduce staff workload.

- Convert discharge instructions into clear, natural voice
- Send voice reminders for appointments and medication
- Transcribe clinical notes directly into EHRs
- Train staff with on-demand, voice-led onboarding modules

AI voice for healthcare teams

Automate service, personalize communication, and deliver compliant training — all with a human feel

Try it for free | Book a demo

Deliver voice-based training for **HIPAA, ADA, GDPR,** and **FDA compliance**

Answer common questions with **natural-sounding, on-brand, multilingual voice.**

Automate IVR and **digital support** across channels

Learn about our API ↗

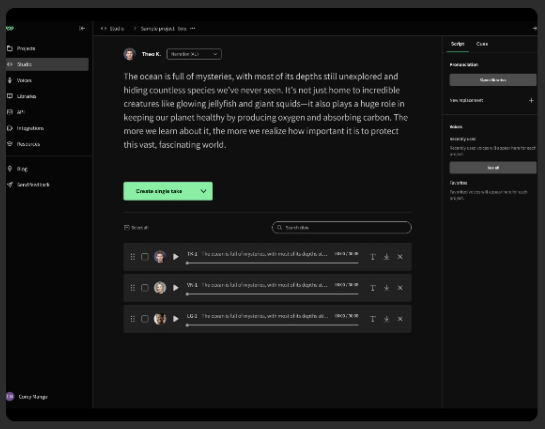

✓ SOC2 ✓ HIPAA ✓ GDPR ✓ HITECH

Built for secure, compliant collaboration

Use AI voice to automate service, personalize communication, and deliver compliant training, without losing the human touch.

- Control access by team, department, or role
- Works with your tools: LMS, EHR, portals, and more
- Keep projects organized, protected, and audit-ready.

CLOSED CAPTIONS

Make voice content accessible and compliant — instantly

Reach more people with inclusive voice content and support patients with disabilities or language barriers. Then repurpose those voices into documentation and training with auto-generated **ADA and WCAG-compliant captions** (SRT, VTT).
