SCALE AND $AVE WITH PERCONA OPEN SOURCE SOLUTIONS

Percona open source solutions maximize business agility and flexibility, ensuring you have the right solutions that fit your environment without locking you into a proprietary solution.

Optimize Database Performance

Delivering outstanding application experiences to your users requires continuous database availability. Uptime, performance, growth, security are all critical when managing application data. Percona helps you get the best performance out of your applications while optimizing your infrastructure to support critical business operations.

Single Point-of-Contact

Percona provides unbiased best-of-breed expertise in multiple open source databases such as MySQL, MariaDB, MongoDB and PostgreSQL. Our partnerships with the major cloud providers (AWS, Google Cloud, Microsoft Azure) give specific insight into what works best so you can reduce complexity and risks.

Maximize ROI

Before purchasing a proprietary solution stack, let Percona help you optimize your current database environment. We can find ways to save you money and improve ROI — ensuring you are making the most of what you already have.

Need Professional Support?

Don't want to be locked-in to your proprietary vendor? You can save 50% or more compared to proprietary licensing by using Percona flexible service options:

Percona Support
24x7x365

For all deployments, including mission-critical applications with complex high-availability requirements.
