

Can you tell we're no good at surprises?

We are positively bursting with excitement to share a sneak peek of some sessions you'll see at Fusion Phoenix. With more than 50 sessions to choose from, educators of every experience level will have the chance to dive deep into topics like equity, formative assessment, literacy, math, and more. In addition to NWEA® product experts and researchers, you'll hear from teachers, administrators, and coaches just like you—who understand the unique challenges and joys of this professional calling.

Will we see you at **Small steps to big impacts: Making justice-oriented science teaching work for you**?

Or maybe we should save you a seat for **I'm all ears: Listening to understand students' ways of thinking in a formative setting**?

And we're right behind you for **Set the hamster free! Driving transformation and improvement with MAP Growth data**. (And don't worry—I've been assured no hamsters will be harmed or roaming wild in this workshop.)

See something you're interested in? **There's still time to register**.

We'll see you in Phoenix June 28!
