

Global Facilities

Our Global Footprint is Your Advantage

Your customers' technology needs to be ready when they need it, shipped on time and ready to plug and play. And Tech Data's global footprint of facilities brings all of your customers' technology within reach, easily dispatched when needed with all proper integrations and repairs completed.

Staffed by highly trained technicians and supply chain experts, our facilities are strategically located near major transportation hubs to ensure that your equipment is delivered quickly, efficiently, and ready to plug and play.

Each of these facilities adheres to Tech Data's Global Lifecycle Management Services' high standards of excellence, including:

Purpose-Built: Designed to deliver IT services, these facilities are staffed with highly-experienced and skilled technicians and engineers. Our teams are well prepared to support the wide variety of specialized requirements we've seen coming from our diverse range of customers and partners.

Strategically Located: Each facility is strategically located in areas with proximity to local universities and other sources of top talent. Each also enjoys ready access to major transportation hubs, allowing Tech Data's Global Lifecycle Management Services to move equipment in from manufacturers and out to your customers quickly and efficiently.

Certified Quality: Tech Data's locations have earned multiple key industry certifications, including ISO 14001, ISO 9001, OHSAS 18001, RIOS and R2, ISO 13485, TL9000.

Provide the Most Value to Your Customer

The greatest value you have is your knowledge of your customer and their time to value from their technology projects. Trust Tech Data to properly prepare and integrate equipment, and provide other foundational services at Tech Data's Global Lifecycle Management Services facilities, including:
