

For Everything That **Makes You Unique**

You Can Help Medical Science Fill in the Blanks. Participate in a Clinical Trial.

Medications and treatments affect everyone differently. The way we address health care issues must be equitable for everyone, and that means people of all ages, races, and genders must have fair opportunities to be diagnosed and treated. By participating in research, you are helping to bring specialized and personalized treatments and cures to everyone, not without regard to race, sex, or socioeconomic status, but designed with special attention for everything that makes you unique.

Learn more and take an eligibility test at BrainHealthFlorida.com, or call 407-303-7193.
