

TEST AND PROTECT

Hamilton County CARES COVID-19 Testing

- Out of 100 people with COVID, as many as 40% of them HAVE NO SYMPTOMS.
- That means 2 out of 5 people with COVID could spread the disease without knowing it.
- If you as provider can't tell who is infected, then testing broadly is the only way out of a perpetual cycle of social distancing and caseload spikes.
- Test and Protect your family, your friends and your community.
