Life put you at the bottom? Then limit is only sky
Must eat just bread and water? The cake is tasty twice.
You understood the tears? Can laugh push you to cry?
If met the death too close – it means, you're still alive!
(Omar Khayyam, translated from Russian by me)

I live in Russia with my daughter of sixteen years under for 10 years lasting acoustic attack in the language of organized crime.

WHAT IS IT? It's not a conspiracy theory.

I'm a smart experienced lawyer and, step by step,
put into entire picture all puzzles with more than enough checked proofs.

Just ask internet - Wikipedia, Google patents, government, science and officials sites - about gang-stalking, Havana-syndrome, Frey microwaves hearing effects, magneto-acoustic resonance, directional targeted sound, radio and acoustic weapons, harm to health of constant or over limited ultrasound and some common equipment like Sonic Nausea or software to bring this harm
(I do not "hear" or feel, for instance, ultrasound of official medical tests),
ultrasound screening of neuro-activity and develops of neuro interfaces,
medical technologies and simple software to increase the suggestibility
and change the brain and psycho sets with acoustic.
Sure, I have the complete scrutiny with all links and data, but this is a resume for social needs – with some pieces from Wikipedia and Medical library at the bottom.

Previously, before people had mass knowledge and open information,
they sent anyone in Russia to a mental hospital in this way.
Now we can't argue with physics, and any simple experiment with radio
and ultrasound devices located according to the patent for these effect
in front of witnesses will reproduce the situation to obtain irrefutable evidence 100%.
And – it must send everyone those involved to prison,
but so far this has not happened inside failed state, like Russia.

This technology has obviously got out of control of operated under law doctors,
military and secret services and is now widely used by organized crime –
it's a sort of developed mafia in the country,
and just a crowd up to the level of schoolchildren.
They - under criminals supervision - use downloaded illegal software,
a combination of smartphones, magnetic field an ultrasound sources, radio emissions,
antennas and ultrasonic radars and scanners, equipment for ultrasonic scanning
of the apartment and the persons in it, secret wiretapping, harmful health effects
and constant radio attacks with deliberately harmful directional ultrasound.
They use and constantly improve and modify AI soft - like program of a SHRINK
(МОЗГОПРАВ in Russian transcription – millions of people online openly discusses
its settings for deliberately negative effects on the brain and psycho-emotional activity
of people through ordinary speakers, AI decoder of speaking and neuro activity
to transform into the sounds waves and vise versa

HOW BIG IS THE HARM?

It depends on individual reaction, level of decibels and lasting of bulling –
as it has cumulative effects. In my case, it's around of the clock
from not less than three apartments above mine and, probably, some ones below.

So if you, like me, regularly eliminate possible problem with health as a reasons for that symptoms by medical tests, ultrasound + radio + magnetic effects + AI soft bring you this:

1) the effect of presence of strangers in the private space with traumatic contacts and constant criminal control and surveillance – interference with the inviolability of the person guaranteed by the Constitution.
It must be qualified as the imprisonment – as their goal, in my case – exactly deprivation of privacy and liberty.
Judging by my feelings, for money they connect everybody calling them with a modified voice assistant program – this is, for example, Alice from Yandex.
They broadcast to me in ultrasonic mode – without letting me sleep and deliberately torturing – the whole range of radio frequencies invented by sadists, various fake acoustic and video effects from rude and obviously dangerous traumatic intervention in neurophysiology, like pressure on the vocal cords and nerves to compel to pronounce words, and not to think in the usual mode.

2) neurological symptoms of radio-acoustic pressure on the ears, eyes, head, diaphragm and larynx from ultrasound scanning of speech and brain neuro-activity and manipulative effects, negative effects on mental health, neurophysiology and psyche – tinnitus and squeaking in the ears, periodic nausea and turbidity of consciousness, suffocation, pain symptoms – until the strong constant pain inside points under attack, difficulty in movement, dizziness.

3) psycho-suggestive irritating triggers, strengthening or provocation of anxiety, guilt, arousal to prevent sleep, or oppression.
They cause changes in the psychophysiological state like drowsiness, fatigue and irritability.

The technology already allows them to create, in fact, neuro-fakes of all kinds of dirt and degrees of unreliability. They use fakes and defamations to manipulate and make the cheap provocations of impossible for me illegal or "strange" behavior – caused by necessary defense or precisely radio acoustic manipulations.
They are already sharing it for people trying to help or involving into situation – like real police and officials – if they're not aware about technology, relatives, colleagues, familiar and friendly guys, potential employers and so on.

Today, the same radio targeted ultrasound with traumatic and manipulative effects is used to poison and manipulate everyone in a row – and people with poor health, obvious contraindications – inside all shopping malls and shops in the city, they can be heard in transport, in government institutions, medical, schools buildings.

Accordingly, it turns out that mass alternative channels are quite openly organized and operating in the city - used against private individuals in the interests of criminals of all kinds, ultrasonic radio communication channels through which anyone at any time can transmit anything, inspire people or organize, monitor, manipulate, encroach on health and life, to poison anyone and bully.

This looks likely a system of alarm sensors, inventory radars, insect and rodent repellents – when they are turned on once or in a planned mode, they are considered harmless. But they – intentionally and consciously – dramatically amplify the sound around – to clearly traumatic frequencies and decibels - with the special ultrasound and medical equipment, technology of a directional and amplifying radio signal.
This is possible through activating magnets of RFID keys or bank cards by an NFC signal in any smartphone - it's always a person spinning around with a smartphone at the entrance – to activate them.

And my situation – with the described symptoms from radio-ultrasound and sensitivity to it – clearly develops from bad to worse.
When, sometimes, out of desperation, I just yell at them to stop, they do not hesitate to inform me that they have a “client”.

Also, if I complain and expand the addressees who are obviously aware of the scheme and due by law to react, they begin to intimidate me, even tell by the “official voice” that they will kill me. Since they have repeatedly caused ultrasound tingling in a repeatedly tested and healthy heart, brought me an acoustic trauma by smartphone, this is quite possible, you know the capabilities of modern weapons, and these are not empty threats at all.

I don’t have other way to try to save my life except make this public – I described mostly open secrets, so don’t seriously cross the road for the big bosses from criminal and officials world (almost the same in Russia)– and they will never recognize their connection with the obviously criminal system. Maybe, they still have a little time to react to the cases of obvious tortures, blatant mass break of a half of Constitutional rights and put this under control. BUT – as I see – they’re losing real power here with escape velocity.

My daughter, even if she is not a direct target, feels nerves and bad – as she sees my – still not successful - struggle against this monster. She does not sleep when I run around at nights, loudly send them to hell. I try to explain her all this stuff about real villains and promise to replace her as soon, as I can. They stole her childhood.

WHY ME? CAN EVERYBODY BECOME A VICTIM?

Organized total radio harassment began at first while I worked in the international company, and it was obviously ruled by the very strange (with criminal and out of moral behavior) part of Russian management. Then it increased hardly at Customer Service at the District Administration, then forced else during work for regional Department of the EMERCOM.

It is the obvious torture-level for last two years – as I realized at least, what is it, started to claim, make it public, ask about help to leave the country, and due to some circumstances in private life and because of all vital systems failed during the war.

Being a competent and experienced lawyer, I always notice ignorance and imitation of work and results, improper promotion, wild schemes with uncontrolled bonuses in favor of bosses and their numerous "deputies" – inside budget entities, illegal cash, nominal workers, the absence of labor protection (even when working on the street), corrupt regulations and practices.
I am not a professional fighter against corruption, but I never pass by out of simple professionalism, and I find ways to at least make something public and attract attention.
Being a pro-democracy and anti-military person – I provide my thoughts and believes as I can and as the current legal field let do inside country.
Being an educated and self-developed charismatic person – in Russia I'm too much bright, too much fair, independent and active in rights protection, too much smart and brave – too much for completely outdated, uneducated, unmoral and sick society. They easy unite under their sadism, low instincts, greedy, stupidity and envy to use me for free, to steal any assets, to hate, harass, prevent success, try to put me at their level.

There are around 200 victims as one account on X social media was noticed.
There are more than 400 subscribers inside some groups of victims in vk.ru social media.

As they say, they are activists, victims of scammers, mad neighbors, haters, former or manipulative partners, unfair employers and competitors and clients.
And – till the obvious strange symptoms, till they open the internet search – they could try to treat with medicine and without success for years something like depression, hypertension, insomnia, nerves, mental health, heart, headache problem and so on.

I can't think, how many victims could be and what the executors feel free to do inside prisons, military and closed medical divisions.

WHO THE BUTCHERS ARE:

1) corrupt officials and military, police, secret service tech and others departments,
2) their former workers, families - misusing the power – as the state let them think, they are above the law - or to cover their crimes -

In the service of the Ministry of Emergency Situations, for instance, I was brutally bullied as I asked about millions of serious obvious violations of Law, about legal salary (there is Russian system of illegal cash everywhere across government services). And, in addition to obviously organized by some bosses colleagues, there were the people from the anti-corruption department, who directly feel sorry f or the "poor" firefighters in the corridors – caught precisely on bribes.

While I hardly, but promote in the courts partially legitimate decisions in my favor –
all the time there are clearly specifically forceful–looking uncles flashing around –
they enter the offices of the regional court before "strange" verdicts –
like directly contradicting the cases of the Supreme Court, for example.
They try to illegally listen to me from next door apartment before such "strange"
decisions from cassation - and they directly threaten to influence decisions if I –
as it should be – send them away as known criminals.

Started in 2024, I claimed about this system to Departments of buildings and sanitary
control, Police, Secret service, Public prosecutor's offices –
both civil and military levels (to Interpol collaboration, Internal security department too),
Committee against tortures - of the city, region, federation.

I have no clue about the course of a possible investigation, as well as clear results.
No real changes were noticed, except that they actively began to be represented
by employees of all types of law enforcement officers.

People write that local police officers are patrons of this scheme and use it,
among other things, to send lonely old men to the next world in a community with
organized crime. Should I think so?
Why not?

Ultrasound is caught and recorded by a professional noise meter,
but it is not available to citizens in Russia because of the price – up to $ 2000
with average income around $ 5 000 per year.
But even my smartphone registers it all the time, radio frequencies are tracked
and any radio conversations can be deciphered and listened to,
and they are 24x7 in touch and tortures.
Simple wiretap of neighboring apartments would prove the occupation
of the inhabitants 100%.

3) mass scammers – they are obviously the same or under protection
4) of previous criminal groups – and their attempts to force me to take out a loan
and invest in crypto-currency through Sberbank.
This is clearly from their hacked voice assistants I am attacked by crowds of fake
celebrities. They united with audible negative manipulations of criminal ultrasonic
"marketing" that has proliferated in all stores, banks, services and reached apartments.
These are deeply criminal – the level of experiments of Nazi Germany –
ultrasound scans of brain neuro activity to identify and use behavioral triggers,
manipulation – up to acoustic injuries - using directional ultrasound,
scanning barcodes from goods located at home.

All bank accounts are clearly being monitored for possible theft of funds from them,
which, suddenly, according to their calculations, may fall on me out of nowhere.
So I forced to protect even my bottom cent with sets of options.

4) perverts, sadists, haters, drug and illegal cash dealers and other criminals, fake pseudo helpers and fans – they are obviously organized and put around me and daughter by the first group of criminals –
like “colleagues”, “friends and familiar guys", “psychologists", "recruiters", "consultants", "protection", "communications", "promotion on the network" through criminal "communities".

They are mostly scammers too – try to push me to work for free, to illegally promote themselves, probably even to use manipulations to get some benefits from my life circumstances in illegal games like totalizator, to steal my personal data, content and work results, get money from their “clients”- if they have no clue about criminal law or criminals too.

As I see, army of them are here because of their mental problems, in order to satisfy base instincts, try to illegally compete, revenge and so on.

WHY THAT IS TOTALLY ILLEGAL IN SUCH VERSION?

It’s illegal around the globe – under International Conventions because of obvious blatant violations of humans rights – for health, liberty, dignity and be protected against tortures, for privacy, personal data, privacy of correspondence, telephone conversations, postal, telegraphic and other communications, inviolability of person and home, freedom of thoughts and believes and for well-being environment.

The Nuremberg Code also prohibited illegal experiments on humans, and they are clearly doing just that: they are looking for and "improving" poisoning triggers, trying to force the manipulation with consciousness and behavior

Russian federal Law "On Weapons" prohibits the circulation of weapons and other objects, the damaging effect of which is based on the use of radioactive radiation and biological factors, electromagnetic, light, thermal, infrasound or ultrasonic radiation.

They are deliberately violated Sanitary limits of ultrasound
Ultrasound, especially if it sounds constantly –
is deliberately harmful environmental factor.

Russian Rules indicates the harmful level of ultrasound if it is "heard" by sensitive people – and such quite a lot. It defines the permissible level of ultrasound in residential and public buildings as the level of a factor that does not cause significant concern to a person and significant changes in the indicators of the functional state of systems and analyzers sensitive to ultrasound exposure.

No "secret" measures of obviously harmful total surveillance and, moreover, harm to health can be applied by anyone in the state to civilians without law and order.

In the obvious signs of the elements of crimes:

1) harm to health – mental, nerves and neurological systems, tortures
2) illegal penetration into residential premises, hacking of gadgets and access to private life, banking, medical and tax secrets,
3) illegal trafficking of spyware and hardware - use of specially adapted equipment and software for the secret receipt and processing of personal information, bio data

4) dangerous excess of sanitary limits due of exposure duration and intensity – up to the level of weapons and special equipment – that is, also illegal trafficking in acoustic, wave, electric, radio and psi weapons
5) organized massive weaponized hooliganism – like riots against the base humans rights – not just disorderly conduct.

ARE THERE THE WAYS TO STOP THEM and what is the rehabilitation?

To make the harm less we can use earplugs, headphones, and anti–noise slightly, screens, jammers, some medicine for nerves. It reduces the harmful and painful effect, but does not eliminate it.
To stop them totally we must just leave countries where there is no law and order and eliminate them around us inside normal society – with police, including Interpol, safe guards, tech tools and making that public. Then, as others victims say, there will be return to normal nerves system and normal level of sensibility to ultrasound.

As for public safety – do you see the next fast growing and extremely dangerous level of organized crime? Here is it.
There must be criminal punishment for using targeted sounds, ultrasound without very special needs and permanent control, for using without doctor's license any software or equipment with psycho, nerves or physiology effect and public investigations to catch, punish and stop the mass crime.
There must be invented and produced common cheap signalization – like ultrasound catching tools – around ears, for instance, at the entrances of the buildings, inside rooms - to prevent the targeted sound. Probably it's time to provide for mass radio acoustic protection and limits for buildings.

If no one stops them, is the next stage the adaptation for mass "operations", for example, laser scalpels - like surgeons operating on the cornea – why not?
Criminal ultrasound scanning of the brain has been established, the control points of the centers of speech, thinking, and emotions are known.
So, a couple of remote signals to everyone on the street or through picking holes in the ceilings and, hello, a brave new world of real zombie freaks under criminal control?

So what the criminals – including propaganda, hidden marketing, some illegal medical or security practices with – the psy-weapon – competitors, spies, employers-slavers, call-scammers, haters and stalkers, any manupulators around the world use to bring us nerves, sleepy or foggy, aggressive, overexciting or slowly thinking?

How do they use ultrosound monoring by illegal scan with decordering of neuro and speech activity with the target to use us, manipulate, torture, break down and destroy or transform our behavior, activity and personality?
Have you ever heard about that?
The ultrasound is imperceptible, though

Look through that and don't say, you don't hear of that
https://en.wikipedia.org/wiki/Microwave_auditory_effect#:~:text=The%20microwave%20auditory%20effect%2C%20also,of%20any%20receiving%20electronic%20device.

Well-known – from the Second World War – Frey effect
of our possibility to hear some sounds inside internal ears –
it's easy now because of total untrasound and cell radio in the air

See sound from ultrasound for a beam of ultrasound that makes audible sound in a restricted target area without a receiving set.

Directional sound refers to the notion of using various devices to create fields of sound which spread less than most (small) traditional loudspeakers. Several techniques are available to accomplish this, and each has its benefits and drawbacks. Ultimately, choosing a directional sound device depends greatly on the environment in which it is deployed as well as the content that will be reproduced. Keeping these factors in mind will yield the best results through any evaluation of directional sound technologies.

Systems which guide evacuees during an emergency by the emission of pink noise to the exits are often also called "directional sound" systems.

Line array of speakers

Basic theory [edit]

In all wave-producing sources, the directivity of any source, at maximum, corresponds to the size of the source compared to the wavelengths it is generating: The larger the source is compared to the wavelength of the sound waves, the more directional beam results [*citation needed*]. The specific transduction method has no impact on the directivity of the resulting sound field; the analysis relies only on the aperture function of the source, per the Huygens–Fresnel principle.

The ultrasonic devices achieve high directivity by modulating audible sound onto high frequency ultrasound. The higher frequency sound waves have a shorter wavelength and thus don't spread out as rapidly. For this reason, the resulting directivity of these devices is far higher than physically possible with any loudspeaker system. However, they are reported to have limited low-frequency reproduction abilities. See sound from ultrasound for more information.

Speaker arrays [edit]

While a large loudspeaker is naturally more directional because of its large size, a source with equivalent directivity can be made by utilizing an array of traditional small loudspeakers, all driven together in-phase. Acoustically equal to a large speaker, this creates a larger source size compared to wavelength, and the resulting sound field is narrowed compared to a single small

It's about how easy to get and send directly for you –
with using ultrasound - the directional target sound –
and nobody hears that except you –
so they feel free to declare you crazy –
as they bring the torture frequencies and humiliate triggers
only into your internal ears

https://ru.wikipedia.org/wiki/Магнитоакустический_резонанс

Is that look like the proof, that everybody knows
how to enhance the ultrasound with any magnet?
Russia uses for that – as I feel and hear –
the electrical ungrounded cable under pedestrian and transport roads and there is huge difference in the level of my traumatic feelings if I use the land surface

Magnetoacoustic resonance - W

Magnetoacoustic resonance

Material from Wikipedia, the free encyclopedia [edit | edit code]

Magnetoacoustic resonance is a phenomenon of the emergence of a connection between sound and spin waves in ferro-, ferri- and antiferromagnets when the lengths of sound and spin waves approach each other. The phenomenon of magnetoacoustic resonance was discovered by A. I. Akhiezer , V. G. Baryakhtar , S. V. Peletminsky in 1956 [1] [2] . It makes it possible to excite spin waves using external ultrasonic waves, ultra- and hypersonic waves using spin waves or oscillations of an external magnetic field, to convert an electromagnetic signal into a sound signal and a sound signal into an electromagnetic signal. Based on the phenomenon of magnetoacoustic resonance, hypersonic and ultrasound generators with adjustable frequency have been created.

WIKIMEDIA project | Powered by MediaWiki

https://en.wikipedia.org/ wiki/Psychoacoustics

It's about the proved well-known effect of sounds
frequency and loudness in the brain,
mind, psychology and physiology
It's enough to have soft-ware inside smartphone
to make you furious, foolish or sleepy –
inside any negotiations, meetings or public events

Some – very old (!) Russian medical patents about
how to treat psychological diseases
with imposed sounds into the internal ears or video
What can stop now the criminal – of all sorts – to implant you -
just using any ultrasound plus special soft-ware in smartphone – any idea,
“thoughts”, impulse, - if you don’t know that?

THE METHOD OF TRANSFORMATION OF VERBAL AUDIO INFORMATION TO THE LEVEL OF SUBTHRESHOLD PERCEPTION UNDER PSYCHOPHYSIOLOGICAL INFLUENCE Russian patent of 1999 for IPC A61M21/00 RU2124371C1

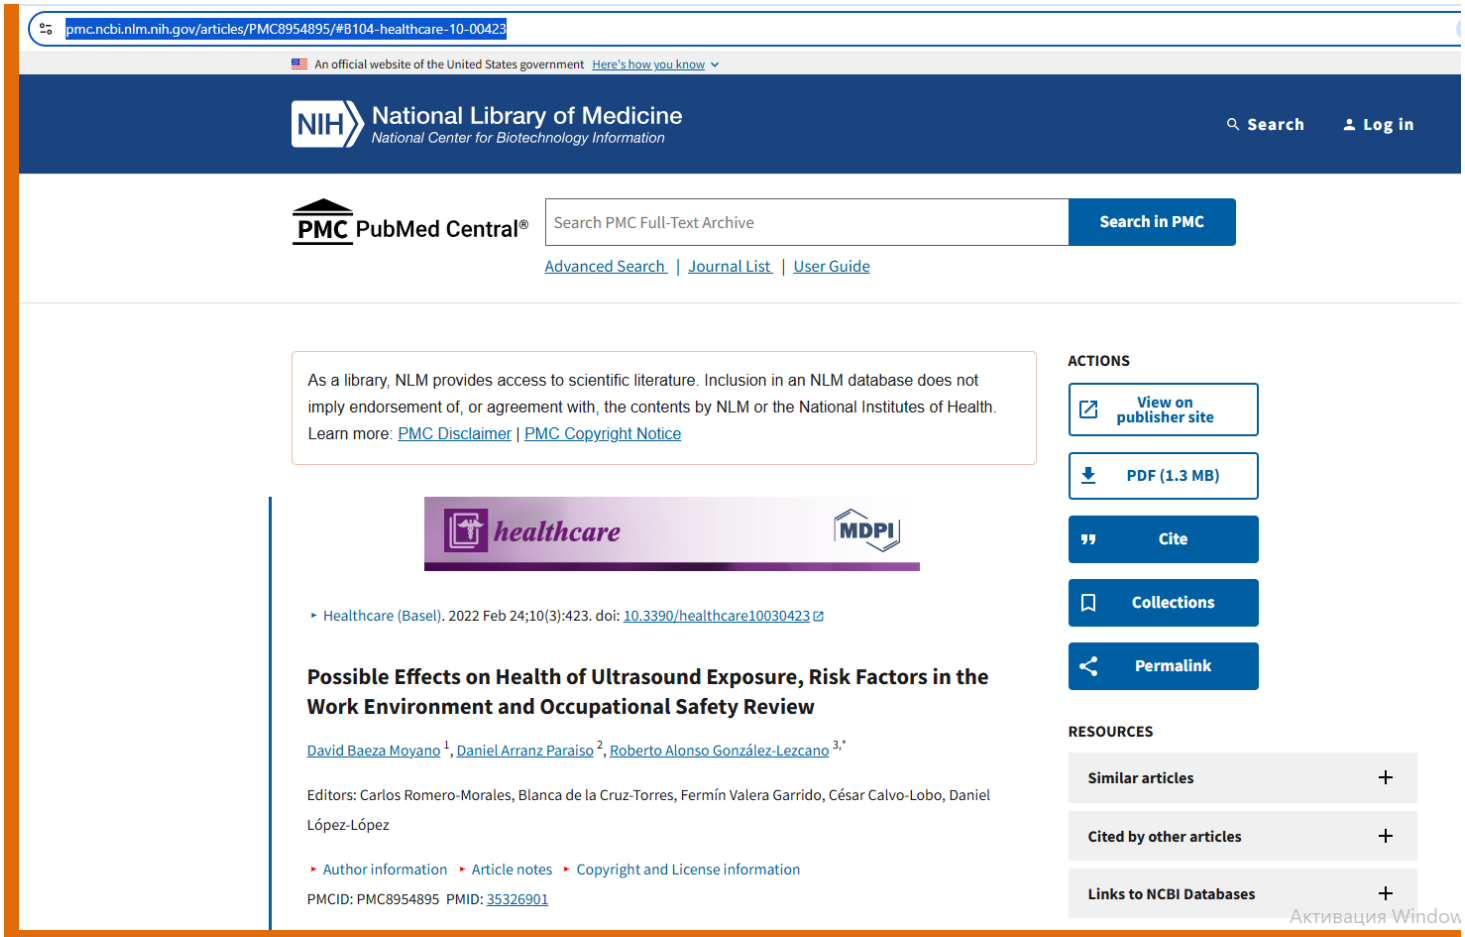

There are known ways of transforming verbal audio information to create an unconscious suggestion that allows you to influence a person's psychological attitudes, change his attitude to certain frustrating situations.

For example, a method is known for stimulating and producing an altered state of consciousness (WO 90/01967, 03/08/90), in which verbal audio information is superimposed on a noise signal and, after wave modulation, is fed through a head phone to an auditory analyzer, while only barely distinguishable or completely indistinguishable words can be heard by the patient. Such a signal transformation increases the right hemisphere's susceptibility to information.

AN ADAPTIVE METHOD FOR REMOTELY DETECTING HUMAN REACTIONS TO UNCONSCIOUS MENTAL STIMULI BY ANALYZING HEART RATE VARIABILITY Russian patent of 2013 for IPC A61B5/16 RU2480156C1

A METHOD FOR PURPOSEFULLY CHANGING A PERSON'S PSYCHOEMOTIONAL STATE THROUGH COMPLEX AUDIOVISUAL STIMULATION Russian patent of 2010 for IPC A61B5/476 A61B5/482 RU2407432C1

The inclusion of verbal or figurative information in the video, presented at the level of sub threshold perception, makes it possible to eliminate the critical processing of perceived information by the patient's consciousness, which increases the suggestiveness of the impact and makes it more effective.The material selected for complex audiovisual stimulation is presented in the form of a video film in digital format, which ensures the safety of the quality of the selected material regardless of the storage time. The digital format is chosen suitable for playback on household video equipment (DVD player). The ease of using the video on household video equipment, which does not require special training of personnel, and the absence of strict requirements for the venue of the session make it possible to use this method not only in a medical institution, but also in everyday conditions.

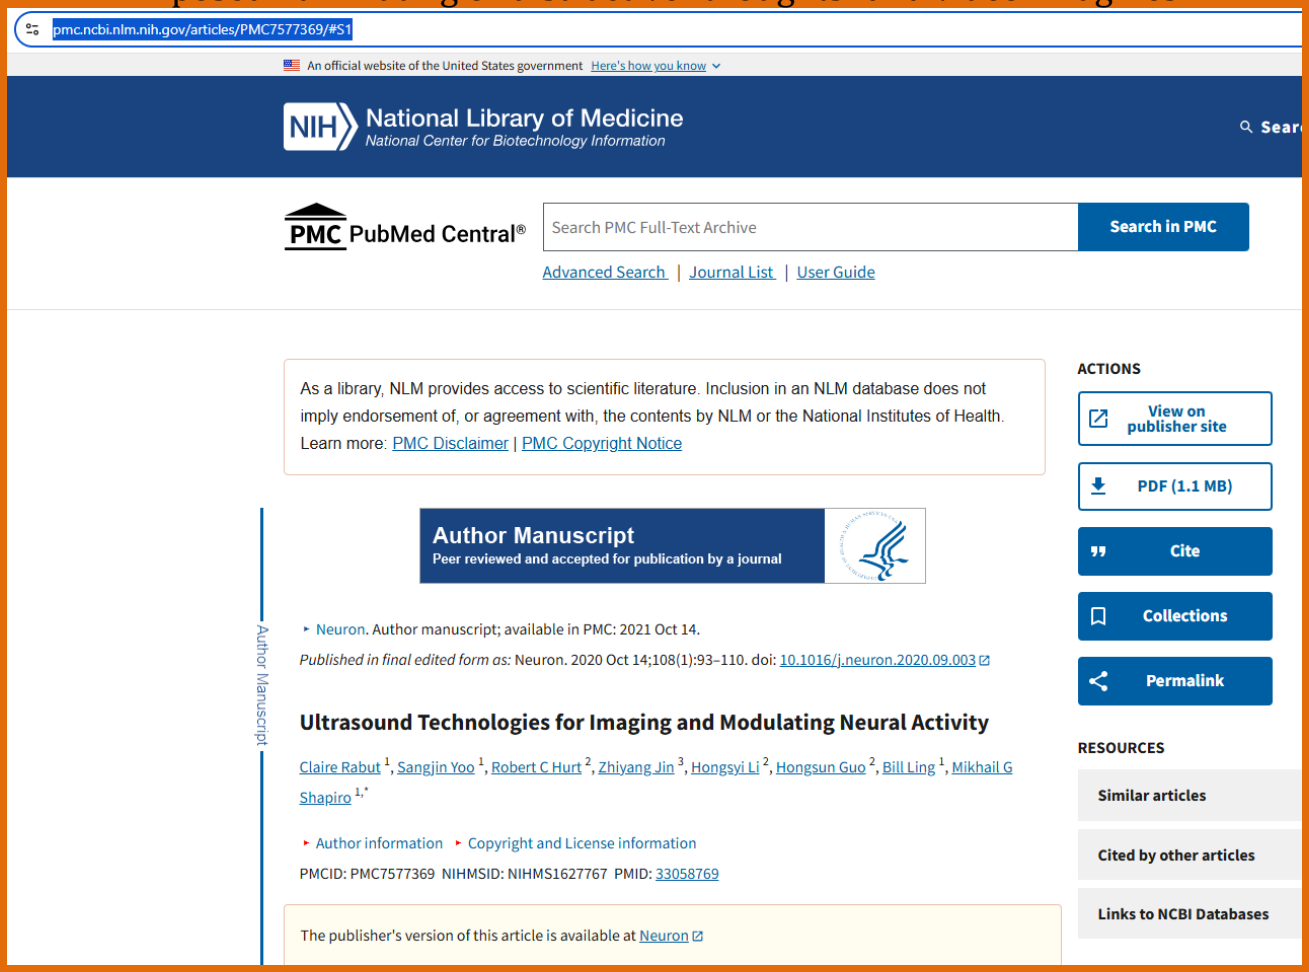

https://pmc.ncbi.nlm.nih.gov/articles/PMC8954895/#B104-healthcare-10-00423

Here it is about the obvious, serious, proven,
but still not enough researched risk of ultrasound –
even for well-controlled medical purposes.
The doctors know.

As for me – the long-term ultrasound around –
as I'm living under criminal acoustic attack –
makes me too sensitive even for so-so common level
of the equipment against insects or smartphone software
(what for any guys around can use that except torture or providing of spy and criminal technologies –
like scans, manipulations and so on?)
I felt better if I could leave the poisonous environment
even for a short time, so I believe,
that the escape from under torture
will treat me again and totally

https://pmc.ncbi.nlm.nih.gov/articles/PMC7577369/#S1

And – the icing on the cake – are there the real existing possibilities to scan – any of us – using directional ultrasound –
at any place, with any purpose and with the AI
automatically decoding of the neuro activity?
My neighbors have been doing that for years – together with
the speech movements – to control any step, any thought, any idea. It's painful enough and that's about the torture
of deprivation of privacy. They also use the "tricks" with
imposed humiliating or distractive "thoughts" and video-imagines

Have we already met the level of absolutely non-controlled
using of illegal software- from any smartphone -
together with enhanced by electro-magnet fields
(any smartphone too) damaging and spying ultrasound
(it looks like the base for all these technologies)?

Is it here - any ventilation, any window, basement or power socket?

Judge for yourself, I have done my part to warn you.

Russia has done that for the last years totally and the criminal power and the life into concentration camp are reality here.
