

PRESS RELEASE

Methamphetamine Detox Now Available at Soul Surgery in Scottsdale, AZ

Soul Surgery Specializes in Detox from Crystal Meth

Soul Surgery Addiction and Mental Health Center(s), located in Scottsdale AZ, are the #1 Methamphetamine Detoxification facilitie(s) for crystal meth psychosis. Soul Surgery provides the highest quality Medication-Assisted Treatment (MAT), combined with state-of-the-art bio-psycho-social therapies, to tailor each patient's recovery plan.

Testing tells our licensed medical team what the patient's body lacks. Then, with this critical component of the Intake Assessment, Soul Surgery develops a special protocol for each stage of the methamphetamine withdrawal. This protocol for acute meth-induced psychosis can involve evidence-based psych medications (antipsychotic medications and benzodiazepines), individualized personal therapy, group therapy, and a plethora of ancillary services. These ancillary services may include IV Therapy, Craniosacral Therapy, Acupuncture, Massage, and BioSound Feedback. Contrary to popular belief, studies have shown that there are medications to help reduce the cravings and ease withdrawal from methamphetamine.

Relapse prevention of meth usage is also critical. At Soul Surgery, we also treat co-occurring disorders including depression and anxiety as an important means of preventing relapse to meth use. [Studies](#) have shown that stopping the use of methamphetamines diminishes the recurrence of psychotic symptoms.
