GROUP14

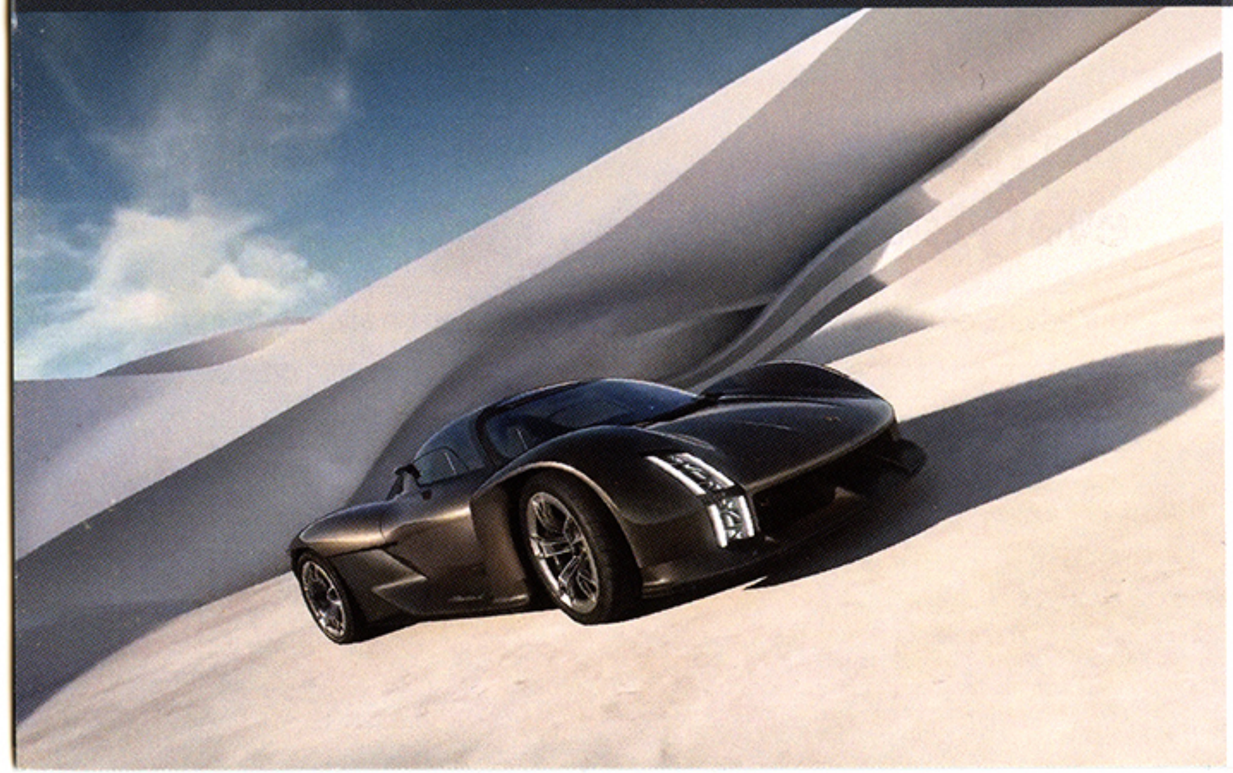

LEADING THE SILICON BATTERY AGE

Group14 is the world's largest manufacturer and supplier of advanced silicon battery technology. We're enabling a world where anything that can run on rechargeable batteries, does.

Let's electrify everything together

We're always looking for passionate, curious people to join Group14's growing team. Come work with us.

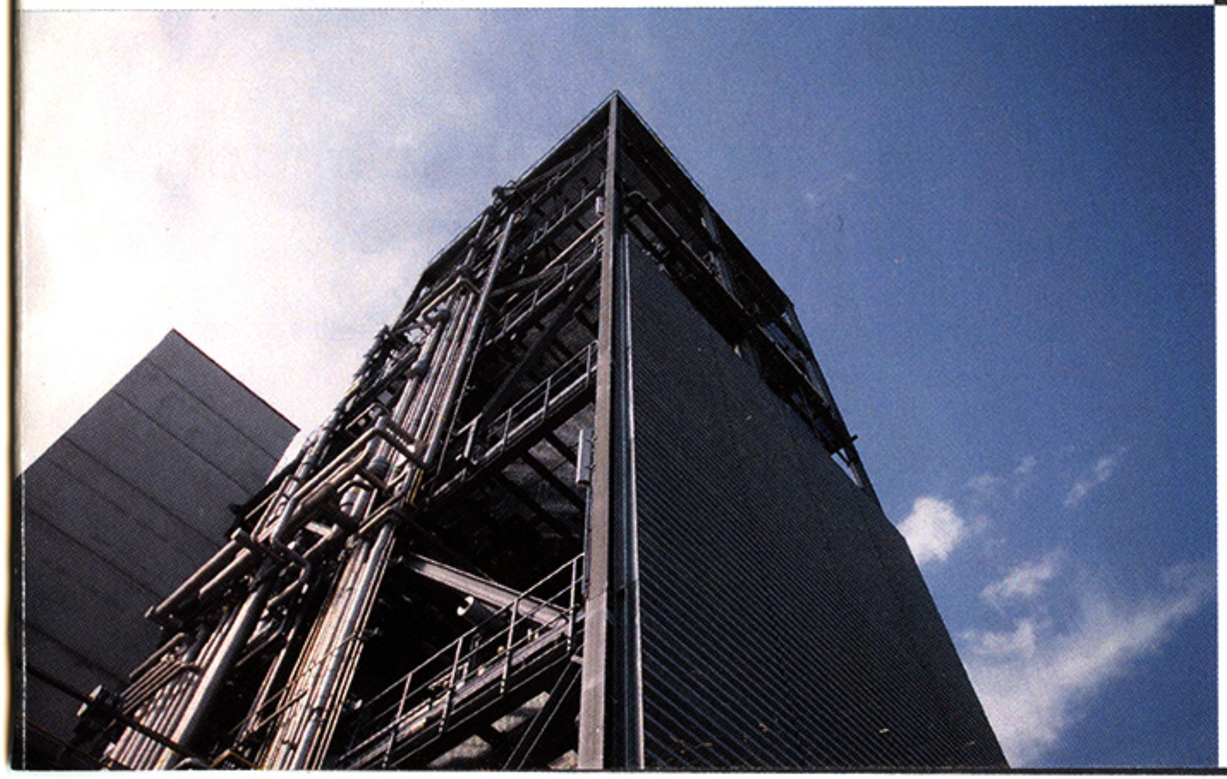

The world leader in silicon battery technology manufacturing

To reach commercial scale quickly, we perfected a repeatable process for manufacturing SCC55™ anywhere on Earth. We call it modular manufacturing, and it's helped us deliver SCC55™ to customers representing 95% of worldwide battery production.

Our values and collaborative culture

Driven by passion, collaboration, tenacity, integrity, and safety, we believe innovation thrives when everyone feels at home. At Group14, our unique talents, skills, and experiences come together to achieve the remarkable. Our mission is to provide the world with transformational battery materials to accelerate the electrification of everything.

We're on a quest to electrify everything

Our advanced silicon battery material, SCC55™, can be manufactured anywhere across the globe. The material enables batteries to charge in minutes and hold up to 50% more energy density than traditional lithium-ion batteries. We're helping to solve the world's biggest energy challenges for EVs, consumer electronics, electrified flight, and more.

OUR LOCATIONS

WOODINVILLE, WA

Our headquarters, BAM-1 factory, and R&D center.

SEATTLE, WA

Our corporate offices – located in the heart of South Lake Union.

MOSES LAKE, WA

Our BAM-2 factory – the world's largest advanced silicon battery material factory, operational in 2024.

SOUTH KOREA

Our Gimcheon and Hwaseong offices supporting engineering, business development, and R&D for APAC.

GERMANY

Our Silane factory and rapidly expanding European operations.
