# SPRING BEAU

**Pro Trick!**

Keep it all about the eyes by dusting a soft peach blush onto cheeks and going for nude lips with a touch of shine. "Bright shades will compete with your eyes," says Francelle Daly, Nars brand ambassador.

# 2 Cat Eyes

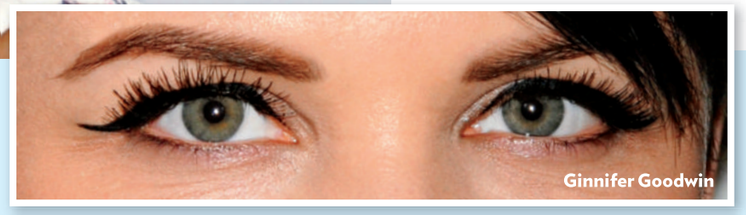

## Define eyes the cool way with black liquid liner

*** Stay close to lashes** Start with a thin line near the inner corner of your eye. Then make it thicker as you extend it a little bit past your eye's outer edge.

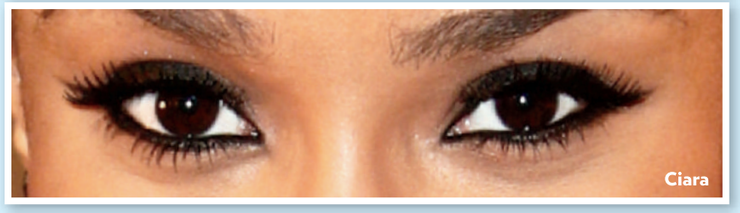

*** Amp it up** Line your bottom lids too, but use a soft black pencil.

***Pro Trick!***

Create a flirty feel by flicking the line out and up. "Do a quick upward stroke toward the end of your brow," says Daly.

Ciara

Amber Heard

# 3 Silver Eyes

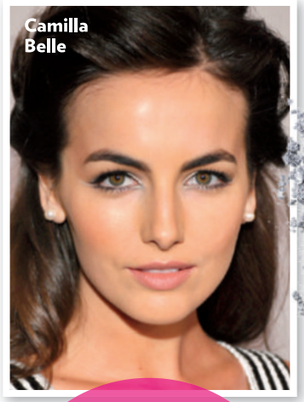

## The metallic-of-the-moment brightens any eye color

*** Pick your formula** Go for a pencil to highlight the lashline. Try a cream or powder shadow to give lids an all-over glow.

*** Complete the look** Black mascara adds definition so the silver really pops.

# 4 Full Brows

Diane Kruger

**Pro Trick!**

Line and fill in lips with clear lip liner first, says celeb makeup artist Ashunta Sheriff. It'll keep the color from feathering or changing. **Try: Mary Kay Lip Liner in Clear, $12; marykay.com**

# 5 Red Lips

**The glam shade feels fresh with a clean, radiant face**

* **Find your best red** A shade with blue undertones complements fair complexions. Brownish reds and orange-y hues work well for darker skin tones, says Willer.

* **Use a brush** Carefully apply a layer of lipstick, then blot and repeat.

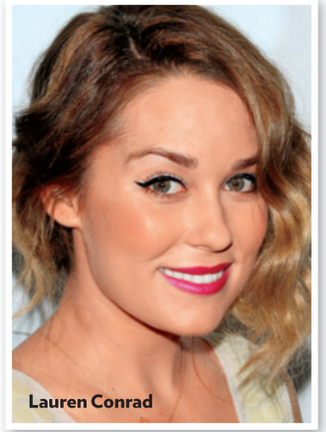

Joy Bryant

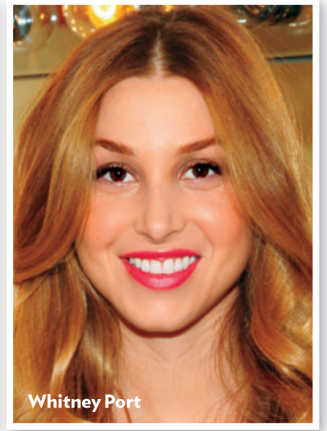

# 6 Hot Pink Lips

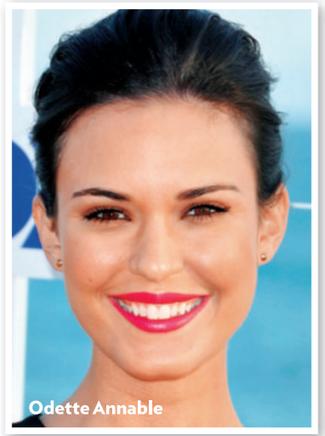

**It's a playful take on the bold look**

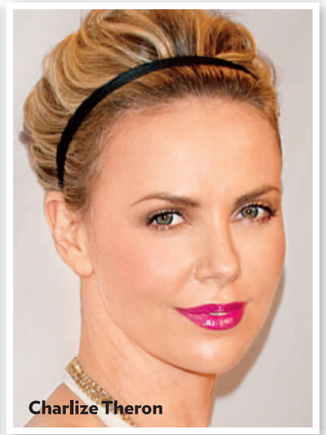

* **Choose the right pink** Fair faces look great in fuchsia, says Willer. Neon and raspberry shades are best for darker skin tones.

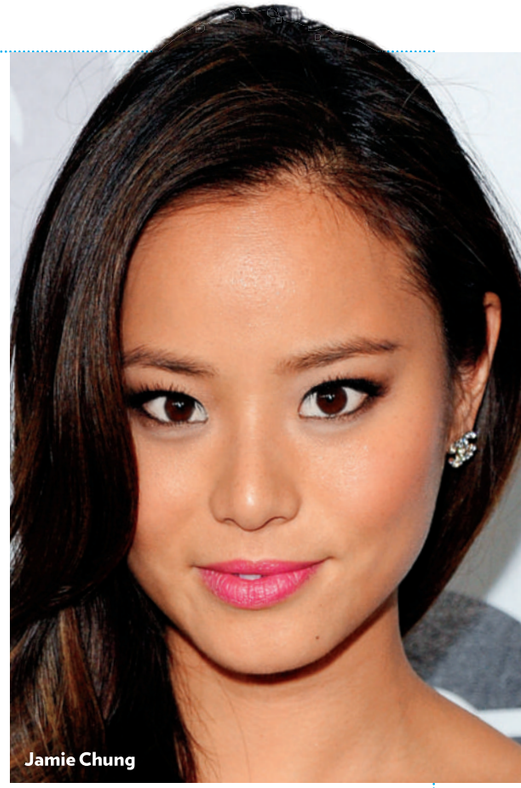

* **Try matte or shiny** Both are in this spring. If you go matte, make sure lips are smooth and moisturized before you apply.

# 7 Rosy Cheeks

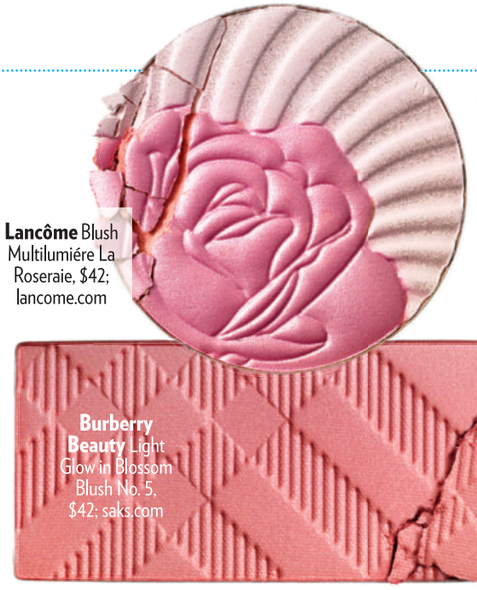

**Soft, healthy-looking color wakes up skin in the prettiest way**

* **Opt for a luminous finish** A shimmery blush looks great on everyone, says Daly. Powder formulas are best for normal to oily skin. Creamy textures work on normal to dry skin.

* **Match your lip color** To create a modern monochromatic look, choose a lipstick or gloss in the same color family—whether it's pink, peach or mauve.

**Clarins** Instant Light Blush in Vitamin Pink, $28; clarins.com

**Lancôme** Blush Multilumiére La Roseraie, $42; lancome.com

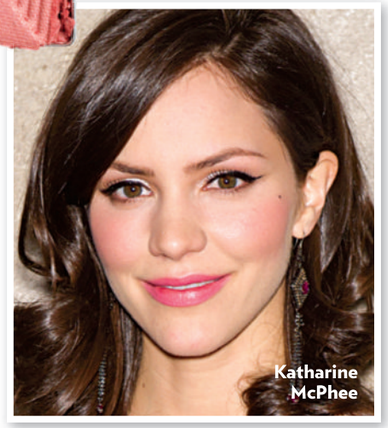

**Burberry Beauty** Light Glow in Blossom Blush No. 5, $42; saks.com

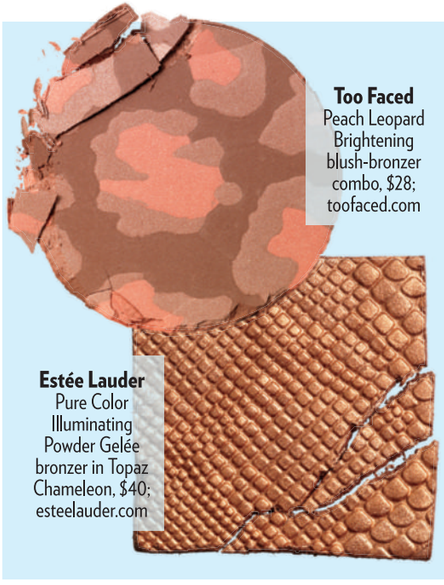

**Pro Trick!**

For the most natural look, pinch your cheeks and find a blush that matches that flush. "Watch out for shades that are too light—they'll make you look chalky," says Daly.

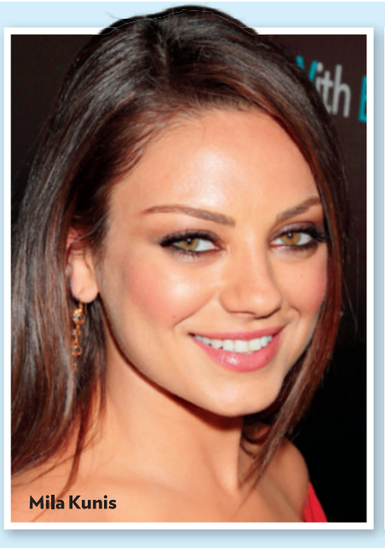

**Givenchy** Le Prisme Blush Bucolique #2, $49; Sephora, 877-737-4672; sephora.com

# 8 Sun-kissed Skin

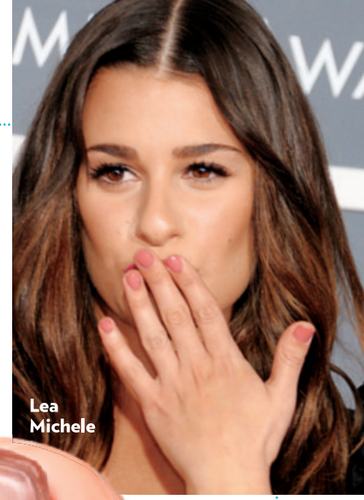

**It's all about a light bronzey glow**

* **Go subtle** For a believable color, use a bronzer that's only a shade or two darker than your skin.

* **Get flushed cheeks** Put bronzer on first. Then apply a blush (see our picks above) on the apples of cheeks. A blush-bronzer combo works too.

**Pro Trick!**

With a brush, apply bronzer at your temples and sweep it diagonally down cheekbones, then along your jawline, says Sheriff.

Lea Michele

# 9 Pink Nails

**From rose to bubblegum, pastel shades are a mani must-have**

* **Try the latest nail shape** Think short to medium length, with round tips, says nail expert Jin Soon Choi.

**Sally Hansen** Smooth and Perfect Color + Care nail polish in Satin, $5.49; at drugstores

**Chanel** Le Vernis Nail Colour in May, $26; chanel.com

**Pro Trick!**
Apply gloss to make this everyday do more elegant and sleek. "Spritz on a shine spray to finish, and you're ready for a night out," says Philippon.

# 10 Ponytails

## The easy-to-do style now has a chic feel

* **Stay smooth** Brush your hair back and gather it at the nape of your neck for a polished look, says Laurent Philippon, Bumble and bumble stylist.
* **Do a center or deep side part** It instantly makes your pony more interesting.
* **Create softness** Leave out a few layers around your face, add some waves to the tail or go for height at the crown.

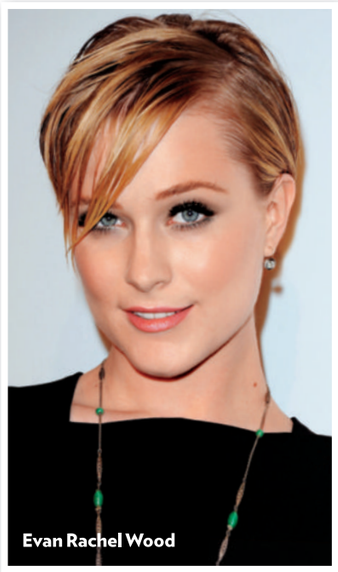

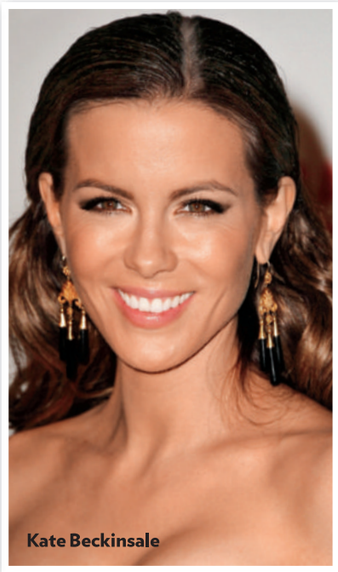

# 11 Slick Strands

## This high-shine wet look can go edgy or soft

* **Use the right product for your hair texture** Comb in gel if you've got thick, wavy or curly hair. Smooth on a serum if your strands are fine or straight.
* **Just do the top** Keep your ends free-flowing with little product (like Kate Beckinsale, far right) for subtle contrast.

**Pro Trick!**
Start with a small amount of product, then add more as you need it, says Guido Palau, Redken creative consultant. A little goes a long way.

# 12 Bouncy Hair

## Feminine '70s-inspired styles make a comeback

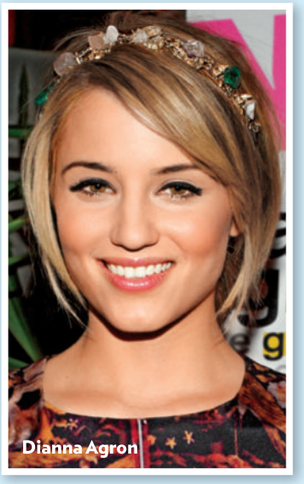

* **Build in body** Use a round brush when you blow-dry to get volume.
* **Create curls** Wrap medium sections of hair around a 1" curling iron to add loose texture, says Philippon. Let curls cool before tousling them with fingers or brushing them out a bit.

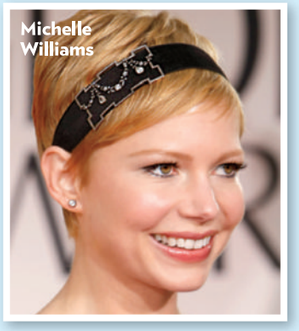

**Pro Trick!**
Instead of extra-hold styling products, opt for lightweight sprays and volumizers. Movement makes this retro look more modern, says Palau.

# 13 Headbands

## The "it" hair accessory makes any do extra special

* **Go for sparkle** It's all about a statement piece, says Philippon. Rock a design with stones, beads or crystals.
* **Try it the trendy way** Swoop a section of hair across your forehead and wear your band like a tiara.

**Pro Trick!**
If your band tends to slip, wear a stretchy one with elastic or use bobby pins to keep it in place, says Philippon.

# 14 Undone Braids

## The girlie style gets loosened up and supersexy

* **Make it feel effortless** Divide up sections with your hands before braiding—no need to be exact or get fussy with a comb.
* **Keep it tousled** Texture is a must, says Palau. If your hair is fine and straight, scrunch in a texturizing spray before you braid.

**Pro Trick!**
Skip a shampoo. This style works best on second-day hair, says Philippon.
