COMPAQ

COMPAQ PROSIGNIA SERVER 720 AND PROSIGNIA SERVER 740

All the right features,
priced right for small businesses.

Prosignia Server 720 & Prosignia Server 740

Servers Just Right For Small Businesses

When your growing business is ready to build an office network, you don't need a lot of hassles. You need a no-fuss server with just the right features at the right price.

More businesses depend on Compaq servers than any other brand. Compaq has sold over two million servers — more than twice as many as our nearest competitor. That level of experience in server design tells us what customers want in their servers.

The Compaq Prosignia Server 720 and Compaq Prosignia Server 740 were specifically designed to address the priorities of small businesses. These servers meet our tough standards, yet they're easy to own and easy on your budget.

experience

Easy to buy.

Affordably priced, with flexible financial and leasing options available, these servers make it easy to enjoy true server benefits. Purchasing is fast and flexible — you can buy the Prosignia Server 720 or Prosignia Server 740 direct from Compaq or from your favorite reseller.

Easy to set up.

For the fastest time to solution, order your operating systems pre-installed already on your server. Or configure your server with SmartStart, the intuitive CD-ROM tool that guides you through the installation process. It's that simple.

Easy to maintain.

Because you probably don't have a lot of time or technical resources on hand, Compaq designed these servers to be quick and easy to service. The tool-free design makes accessing the server and upgrading a breeze. And we built in reliability features like Error Checking and Correcting (ECC) Memory and Automatic Server Recovery (ASR or ASR-2) to prevent and correct errors before they cause you headaches. Our award-winning software, Compaq Insight Manager, keeps an eye on your servers to proactively monitor your network to keep it up and running.

reliability

Compaq reliability means lasting value.

value

The Prosignia Server 720 and Prosignia Server 740 are built by the world's most trusted name in servers. So you can confidently network your business, knowing your server has been thoroughly tested and integrated with leading network operating systems — resulting in the most stable and reliable computing environment possible. And they're backed by the Compaq Three-Year Limited Warranty and the Compaq Pre-Failure Warranty, which provides for free, fast replacement of critical components. For an added level of support, CarePaq provides a complete portfolio of services and warranty options designed and priced for the unique needs of small businesses.

easy on your budget

Compaq Prosignia Server 720

High standards at a low price.

The Prosignia Server 720 enables you to get exactly the server you want without buying more than you need. Perfect as a first server, it allows your users to share files and resources, boosting office efficiency and productivity, while still meeting your demanding budget.

- Intel Pentium II processor performance up to 450 MHz, with integrated 512 KB level-2 cache
- Up to 384 MB of 100 MHz SDRAM
- Six total expansion slots
- Integrated 10/100 NIC protects your investment as you update your network
- Internal storage up to 27.3 GB (3 x 9.1 GB)

extended performance

Compaq Prosignia Server 740

Growing room that doesn't stretch your budget.

The Prosignia Server 740 is designed to comfortably handle the increasing demands of a Local Area Network (LAN). It gives you an added level of expansion and performance with significantly more drive capacity and slots — all at a great price.

- Add a second processor for extended performance
- Choose from a range of processors, such as Pentium III 500 MHz or Pentium II 450 MHz, 400 MHz or 350 MHz
- Up to 1 GB memory can satisfy more demanding application environments
- Internal storage capacity up to 45.5 GB (5 x 9.1 GB), so it's not likely that your business will outgrow your storage
- Two PCI and four shared PCI/ISA expansion slots plus two available removable media bays let you easily take advantage of optional components as your needs grow
