

Upgrade to the PowerEdge T560 for powerful VDI deployments

Host more virtual machines (VMs) and experience huge graphics performance gains on the VMs with the latest NVIDIA GPUs

The PowerEdge T560 is built to meet and exceed Virtual Desktop Infrastructure (VDI) needs for a wide range of businesses. Three industry benchmarks were used to evaluate the VDI performance of the T560 compared to the prior-gen T550. Across these benchmarks, T560 customers can:

Host up to **50%** more VMs on the PowerEdge T560

For the energy sector, gain up to **4x** times the graphics performance per every dollar spent on the T560

Leverage **superior graphics performance** across all professional applications tested, including **medical imaging** and **seismic visualizations**
