

The EDA mandate takes effect in August. Your supply chain needs to be ready.

Every manufacturer, importer, distributor, warehouse, hospital, and pharmacy in Egypt is required to capture and report product movement data to the Egyptian Drug Authority.

TraceSync

connects the movement

GTIN

identifies the location

GLN

identifies the location

SSCC

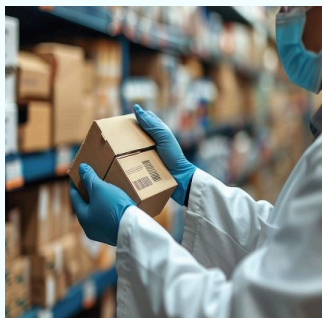

identifies the shipment

Meet TraceSync

TraceSync is GS1 Egypt's cloud-based traceability platform, purpose-built for Egypt's pharmaceutical supply chain. It identifies, captures, and shares every product movement event in full alignment with EDA requirements.

Avoid reporting gaps. Reduce compliance risk. Go live without disrupting your existing systems.

What you get:

- ✓ Fully EDA-compliant reporting, automatically generated
- ✓ Serialization and aggregation support
- ✓ ERP and WMS integration or simple file upload
- ✓ Role-based access for your whole team
- ✓ Arabic and English interface
- ✓ Onboarding support from day one
- ✓ Monthly and annual plans to suit your business size and needs

Our team will show you exactly where your operations stand and how fast you can get compliant. Visit our booth or scan the QR code to get started.
